Surface Area of Triangular Prism = Lateral Area + Area of Bases

$$
\begin{aligned}
& =\text { Perimeter of Triangle } \times \text { Height }+2 \text { Area of Base } \\
& =(\mathrm{a}+\mathrm{b}+\mathrm{c}) \times \mathrm{h}+2\left(\frac{1}{2} \text { base of triangle } \times \text { height of triangle }\right)
\end{aligned}
$$

$$
=(\mathrm{a}+\mathrm{b}+\mathrm{c}) \times \mathrm{h}+2\left(\frac{1}{2} \times \mathrm{b} \times \mathrm{d}\right)
$$

$$
=(\mathrm{a}+\mathrm{b}+\mathrm{c}) \times \mathrm{h}+\mathrm{bd}
$$

You can also visualize the area as that of three rectangles and two triangles.
