

Convert  $\frac{7}{5}$  hour to minutes.

$$\frac{7}{5} \text{ hour} = \frac{7}{5} \times 60 \text{ minutes}$$

Replace "hour" with 60 minutes.

$$= 7 \times \frac{60 \text{ minutes}}{5}$$

Regroup 60 and 5 to simplify with division.

$$= 7 \times 12 \text{ minutes}$$

Divide 60 minutes by 5 to get 12 minutes.

$$= 84 \text{ minutes}$$

Multiply 7 by 12 minutes to get 84 minutes.

---

Convert  $\frac{1}{5}$  hour to minutes.

$$\frac{1}{5} \text{ hour} = \frac{1}{5} \times \underline{\hspace{2cm}}$$

$$= 1 \times \underline{\hspace{2cm}}$$

$$= 1 \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{2cm}}$$

Replace "hour" with 60 minutes.

Regroup \_\_\_ and \_\_\_ to simplify with division.

Divide \_\_\_ minutes by \_\_\_ to get \_\_\_ minutes.

Multiply \_\_\_ by \_\_\_ minutes to get \_\_\_ minutes.

Convert  $\frac{2}{5}$  hour to minutes.

$$\frac{2}{5} \text{ hour} = \frac{2}{5} \times \underline{\hspace{2cm}}$$

$$= 2 \times \underline{\hspace{2cm}}$$

$$= 2 \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{2cm}}$$

Replace "hour" with 60 minutes.

Regroup \_\_\_ and \_\_\_ to simplify with division.

Divide \_\_\_ minutes by \_\_\_ to get \_\_\_ minutes.

Multiply \_\_\_ by \_\_\_ minutes to get \_\_\_ minutes.

Convert  $\frac{3}{5}$  hour to minutes.

$$\frac{3}{5} \text{ hour} = \frac{3}{5} \times \underline{\hspace{2cm}}$$

$$= 3 \times \underline{\hspace{2cm}}$$

$$= 3 \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{2cm}}$$

Replace "hour" with 60 minutes.

Regroup \_\_\_ and \_\_\_ to simplify with division.

Divide \_\_\_ minutes by \_\_\_ to get \_\_\_ minutes.

Multiply \_\_\_ by \_\_\_ minutes to get \_\_\_ minutes.

Name:

Date:

Due Date:

Convert  $\frac{4}{5}$  hour to minutes.

$$\frac{4}{5} \text{ hour} = \frac{4}{5} \times \underline{\hspace{2cm}}$$

$$= 4 \times \underline{\hspace{2cm}}$$

$$= 4 \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{2cm}}$$

Replace "hour" with 60 minutes.

Regroup \_\_\_ and \_\_\_ to simplify with division.

Divide \_\_\_ minutes by \_\_\_ to get \_\_\_ minutes.

Multiply \_\_\_ by \_\_\_ minutes to get \_\_\_ minutes.

Convert  $\frac{5}{5}$  hour to minutes.

$$\frac{5}{5} \text{ hour} = \frac{5}{5} \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{1cm}} \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{1cm}} \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{2cm}}$$

Replace "hour" with 60 minutes.

Regroup \_\_\_ and \_\_\_ to simplify with division.

Divide \_\_\_ minutes by \_\_\_ to get \_\_\_ minutes.

Multiply \_\_\_ by \_\_\_ minutes to get \_\_\_ minutes.

Convert  $\frac{6}{5}$  hour to minutes.

$$\frac{6}{5} \text{ hour} = \frac{6}{5} \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{1cm}} \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{1cm}} \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{2cm}}$$

Replace "hour" with 60 minutes.

Regroup \_\_\_ and \_\_\_ to simplify with division.

Divide \_\_\_ minutes by \_\_\_ to get \_\_\_ minutes.

Multiply \_\_\_ by \_\_\_ minutes to get \_\_\_ minutes.

Convert  $\frac{8}{5}$  hour to minutes.

$$\begin{aligned}\frac{8}{5} \text{ hour} &= \frac{8}{5} \times \underline{\hspace{2cm}} \\ &= 8 \times \underline{\hspace{2cm}} \\ &= \underline{\hspace{2cm}} \times \underline{\hspace{2cm}} \\ &= \underline{\hspace{2cm}}\end{aligned}$$

Replace "hour" with 60 minutes.

Regroup \_\_\_ and \_\_\_ to simplify with division.

Divide \_\_\_ minutes by \_\_\_ to get \_\_\_ minutes.

Multiply \_\_\_ by \_\_\_ minutes to get \_\_\_ minutes.

Convert  $\frac{9}{5}$  hour to minutes.

$$\begin{aligned}\frac{9}{5} \text{ hour} &= \frac{9}{5} \times \underline{\hspace{2cm}} \\ &= \underline{\hspace{2cm}} \times \underline{\hspace{2cm}} \\ &= \underline{\hspace{2cm}} \times \underline{\hspace{2cm}} \\ &= \underline{\hspace{2cm}}\end{aligned}$$

Replace "hour" with 60 minutes.

Regroup \_\_\_ and \_\_\_ to simplify with division.

Divide \_\_\_ minutes by \_\_\_ to get \_\_\_ minutes.

Multiply \_\_\_ by \_\_\_ minutes to get \_\_\_ minutes.

Convert  $\frac{10}{5}$  hour to minutes.

$$\begin{aligned}\frac{10}{5} \text{ hour} &= \frac{10}{5} \times \underline{\hspace{2cm}} \\ &= \underline{\hspace{2cm}} \times \underline{\hspace{2cm}} \\ &= \underline{\hspace{2cm}} \times \underline{\hspace{2cm}} \\ &= \underline{\hspace{2cm}}\end{aligned}$$

Replace "hour" with 60 minutes.

Regroup \_\_\_ and \_\_\_ to simplify with division.

Divide \_\_\_ minutes by \_\_\_ to get \_\_\_ minutes.

Multiply \_\_\_ by \_\_\_ minutes to get \_\_\_ minutes.

Convert  $\frac{1}{3}$  hour to minutes.

$$\frac{1}{3} \text{ hour} = \frac{1}{3} \times \underline{\hspace{2cm}}$$

$$= 1 \times \underline{\hspace{2cm}}$$

$$= 1 \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{2cm}}$$

Replace "hour" with 60 minutes.

Regroup \_\_\_ and \_\_\_ to simplify with division.

Divide \_\_\_ minutes by \_\_\_ to get \_\_\_ minutes.

Multiply \_\_\_ by \_\_\_ minutes to get \_\_\_ minutes.

Convert  $\frac{2}{3}$  hour to minutes.

$$\frac{2}{3} \text{ hour} = \frac{2}{3} \times \underline{\hspace{2cm}}$$

$$= 2 \times \underline{\hspace{2cm}}$$

$$= 2 \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{2cm}}$$

Replace "hour" with 60 minutes.

Regroup \_\_\_ and \_\_\_ to simplify with division.

Divide \_\_\_ minutes by \_\_\_ to get \_\_\_ minutes.

Multiply \_\_\_ by \_\_\_ minutes to get \_\_\_ minutes.

Convert  $\frac{3}{3}$  hour to minutes.

$$\frac{3}{3} \text{ hour} = \frac{3}{3} \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{1cm}} \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{1cm}} \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{2cm}}$$

Replace "hour" with 60 minutes.

Regroup \_\_\_ and \_\_\_ to simplify with division.

Divide \_\_\_ minutes by \_\_\_ to get \_\_\_ minutes.

Multiply \_\_\_ by \_\_\_ minutes to get \_\_\_ minutes.

Convert  $\frac{4}{3}$  hour to minutes.

$$\frac{4}{3} \text{ hour} = \frac{4}{3} \times \underline{\hspace{2cm}}$$

$$= 4 \times \underline{\hspace{2cm}}$$

$$= 4 \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{2cm}}$$

Replace "hour" with 60 minutes.

Regroup \_\_\_ and \_\_\_ to simplify with division.

Divide \_\_\_ minutes by \_\_\_ to get \_\_\_ minutes.

Multiply \_\_\_ by \_\_\_ minutes to get \_\_\_ minutes.

Convert  $\frac{5}{3}$  hour to minutes.

$$\frac{5}{3} \text{ hour} = \frac{5}{3} \times \underline{\hspace{2cm}}$$

$$= 5 \times \underline{\hspace{2cm}}$$

$$= 5 \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{2cm}}$$

Replace "hour" with 60 minutes.

Regroup \_\_\_ and \_\_\_ to simplify with division.

Divide \_\_\_ minutes by \_\_\_ to get \_\_\_ minutes.

Multiply \_\_\_ by \_\_\_ minutes to get \_\_\_ minutes.

Convert  $\frac{6}{3}$  hour to minutes.

$$\frac{6}{3} \text{ hour} = \frac{\phantom{0}}{3} \times \underline{\hspace{2cm}}$$

$$= \underline{\phantom{0}} \times \underline{\hspace{2cm}}$$

$$= \underline{\phantom{0}} \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{2cm}}$$

Replace "hour" with 60 minutes.

Regroup \_\_\_ and \_\_\_ to simplify with division.

Divide \_\_\_ minutes by \_\_\_ to get \_\_\_ minutes.

Multiply \_\_\_ by \_\_\_ minutes to get \_\_\_ minutes.

Convert  $\frac{1}{4}$  hour to minutes.

$$\frac{1}{4} \text{ hour} = \frac{1}{4} \times \underline{\hspace{2cm}}$$

$$= 1 \times \underline{\hspace{2cm}}$$

$$= 1 \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{2cm}}$$

Replace "hour" with 60 minutes.

Regroup \_\_\_ and \_\_\_ to simplify with division.

Divide \_\_\_ minutes by \_\_\_ to get \_\_\_ minutes.

Multiply \_\_\_ by \_\_\_ minutes to get \_\_\_ minutes.

Convert  $\frac{3}{4}$  hour to minutes.

$$\frac{3}{4} \text{ hour} = \frac{3}{4} \times \underline{\hspace{2cm}}$$

$$= 3 \times \underline{\hspace{2cm}}$$

$$= 3 \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{2cm}}$$

Replace "hour" with 60 minutes.

Regroup \_\_\_ and \_\_\_ to simplify with division.

Divide \_\_\_ minutes by \_\_\_ to get \_\_\_ minutes.

Multiply \_\_\_ by \_\_\_ minutes to get \_\_\_ minutes.

Convert  $\frac{5}{4}$  hour to minutes.

$$\frac{5}{4} \text{ hour} = \underline{\hspace{1cm}} \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{1cm}} \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{1cm}} \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{2cm}}$$

Replace "hour" with 60 minutes.

Regroup \_\_\_ and \_\_\_ to simplify with division.

Divide \_\_\_ minutes by \_\_\_ to get \_\_\_ minutes.

Multiply \_\_\_ by \_\_\_ minutes to get \_\_\_ minutes.

Convert  $\frac{7}{4}$  hour to minutes.

$$\frac{7}{4} \text{ hour} = \frac{7}{4} \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{1cm}} \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{1cm}} \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{2cm}}$$

Replace "hour" with 60 minutes.

Regroup      and      to simplify with division.

Divide      minutes by      to get      minutes.

Multiply      by      minutes to get      minutes.

Convert  $\frac{9}{4}$  hour to minutes.

$$\frac{9}{4} \text{ hour} = \frac{9}{4} \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{1cm}} \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{1cm}} \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{2cm}}$$

Replace "hour" with 60 minutes.

Regroup      and      to simplify with division.

Divide      minutes by      to get      minutes.

Multiply      by      minutes to get      minutes.

Convert  $\frac{10}{4}$  hour to minutes.

$$\frac{10}{4} \text{ hour} = \frac{\hspace{1cm}}{4} \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{1cm}} \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{1cm}} \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{2cm}}$$

Replace "hour" with 60 minutes.

Regroup      and      to simplify with division.

Divide      minutes by      to get      minutes.

Multiply      by      minutes to get      minutes.

Convert  $\frac{1}{6}$  hour to minutes.

$$\frac{1}{6} \text{ hour} = \frac{1}{6} \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{1cm}} \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{1cm}} \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{2cm}}$$

Replace "hour" with 60 minutes.

Regroup      and      to simplify with division.

Divide      minutes by      to get      minutes.

Multiply      by      minutes to get      minutes.

Convert  $\frac{5}{6}$  hour to minutes.

$$\frac{5}{6} \text{ hour} = \frac{\hspace{1cm}}{6} \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{1cm}} \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{1cm}} \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{2cm}}$$

Replace "hour" with 60 minutes.

Regroup      and      to simplify with division.

Divide      minutes by      to get      minutes.

Multiply      by      minutes to get      minutes.

Convert  $\frac{7}{6}$  hour to minutes.

$$\frac{7}{6} \text{ hour} = \frac{\hspace{1cm}}{6} \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{1cm}} \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{1cm}} \times \underline{\hspace{2cm}}$$

$$= \underline{\hspace{2cm}}$$

Replace "hour" with 60 minutes.

Regroup      and      to simplify with division.

Divide      minutes by      to get      minutes.

Multiply      by      minutes to get      minutes.
